### SUMMARY

MERN Stack Developer with 2 years of experience. Skilled in React, TypeScript, and scalable web application development, with a strong focus on performance, real-time features, and seamless user experiences. Passionate about delivering high-quality solutions and collaborating in dynamic environments.

### EXPERIENCE

#### ❖ MERN Stack Developer

Collabbez

June 2023 — Present

Karachi (Onsite)

- ◆ Full-Stack Development: Designing, developing, and maintaining web applications using React.js, Node.js, Express.js, and MongoDB.
- ◆ Project Management: Leading the development of two major projects:
  - Learning Management System (LMS): A platform with live sessions, user management, and an integrated meeting conference room.
  - [LMS Project](#)
  - Human Resource Management System (HRMS): A business solution featuring task management, attendance tracking, and real-time chat.
  - [HRMS Project](#)
- ◆ API & Database Management: Developing RESTful APIs, optimizing database queries, and ensuring system scalability.
- ◆ End-to-End Development: Responsible for both frontend and backend functionalities, from architecture to deployment.
- ◆ Performance Optimization: Continuously improving application speed, user experience, and feature enhancements.

#### ❖ Frontend React Developer

Indus Valley Tech

Dec 2022 — May 2023

Karachi (Onsite)

- ◆ Frontend Development: Built and maintained scalable, responsive web applications using React.js.
- ◆ Mobile Development: Developed cross-platform mobile applications using React Native.
- ◆ Technology Stack: Strong proficiency in HTML, CSS, JavaScript/TypeScript, Redux, Axios, and modern UI frameworks.
- ◆ Project Delivery: Successfully completed multiple projects, ensuring high performance and user-friendly interfaces.
- ◆ Team Collaboration: Worked closely with designers, backend developers, and stakeholders to meet project goals.
- ◆ Continuous Learning: Stayed updated with the latest frontend trends, tools, and best practices to enhance development efficiency.

### PROJECTS

#### 1. Learning Management System (LMS) [🔗](#)

- ◆ I was responsible for building both the frontend and backend of the application, including features such as live sessions, class management, and user management. I also integrated Jitsi WebRTC for the video conferencing functionality, allowing students and teachers to interact in real-time.

#### 2. Human Resource Management System (HRMS) [🔗](#)

- ◆ I built the complete system from scratch, including features like task management, attendance tracking, leave management, and the meeting conference room. I also integrated a chat system for both one-on-one and group conversations. Later, I worked with other developers for enhancements.

## EDUCATION

♣ Bachelor of Business & Information Technology (BBIT)

2023 — 2027

Virtual University of Pakistan

## SKILLS

Next.js	Tailwind CSS
React.js	Material-UI
Node.js	Bootstrap
Express.js	JavaScript
MongoDB	TypeScript
Redux	HTML & CSS
